

# COLLABORATIVE LEARNING PROJECT

In the Textbook, at the beginning of each chapter, you will find a list of specific learning objectives.

- Each group member will be responsible for at least one of these objectives.
- Research your objective outside of the textbook, using the Internet and other sources of information.
- Makes sure you list your sources of information.
- Each group will integrate their work together into a related presentation that will be shown to the class.
- Work as a team to research the latest information on your technology objective.
- Use PowerPoint as a tool to bring all your information together for your final presentation.
- The presentation should last at least 5 minutes for each objective. Do a quality job with each objective.
- Explain and define the objective, then provide examples of application and predict how this objective will increase or decrease in value for the future. Provide reasons for your case.

## **Before your presentation:**

1. Meet with your instructor to make sure you will get the maximum results.
2. Submit a printout (handout 3 slides per page).

## **After your presentation:**

1. Submit a copy of your PowerPoint file on a disk, CD or Zip.
