

Digital Cameras: Tips and Tricks

Instructor Vic Jaras vjaras@battle-creek.k12.mi.us

Class Web Page: <http://www.bcvic.net/camera>

This is a hand- on session following a model of discussion, short demonstration, and guided practice. The session is divided into short mini-lessons for us to explore. In the beginning, we will cover WHY and HOW and practice basic skills with digital cameras. At the end, we will APPLY what we have learned to classroom lessons.

Sign in, Introductions

Different types of Digital Cameras-Which is best for the classroom?

What are the pros and cons of some popular features?

Pixels- What is a Mega pixel?

What is Pixelation?

Different Sizes of Digital Images (set your camera for the classroom)

Why the correct Resolution is Vital to a smooth classroom lesson.

Storage and Downloading your pictures into the computer

Strategies for success with students using digital images

Images from other sources (Internet, CD's)

Hands-on taking Digital Pictures –create a lesson with a digital camera

Example lessons that any teacher can do with a single camera.

Class Web Page with resources (links, files, tutorials, manuals, lessons) for extended learning. You can use this web page for additional learning and share it with students for projects.
