

TELLING TIME HOMEWORK

By Vic Jaras

Clocks are devices that help us tell what time it is at different parts of the day. Most clocks have a short hand to tell us the hour of the day it is and a long hand to show us how many minutes have passed since that hour began.

WHAT TIME IS IT?

Circle the hour hand in this picture.

Some clocks have a third hand called a **SECOND HAND** that moves for each second in a minute. There are 60 seconds in each minute, 60 minutes in each hour and 24 hours in each day divided into 12 A.M. hours and 12 P.M. hours.

WHAT TIME IS IT?

Draw a line that points to the second hand.

There are digital clocks in cars and on microwave ovens that display the numbers without any hour, minute or second hands.

WHAT TIME IS IT?

Draw a line that points to the minutes.
